1.1 Stockroom Standard Operation Procedures

The aim is to increase efficiency and deliver consistent outcomes while also ensuring compliance with operational practices—streamlining workflows and improving productivity.

Establishing the Gold Standard

A well-organized back of house is essential to supporting success on the sales floor. Being able to quickly locate the items we need allows us to spend more time with our clients.

Optimized layout for maximized efficiency, placement based on sizing or categories and sell-through. Clear directive for storage & separation of COGs & standardization of supplies storage. The key objectives of an organized back of house following criteria based on a defined options that fit your space.

“We are pioneers at everything we do, and we work hard to keep it that way. Our pioneering spirit generates a contagious energy, which is what enables us to keep putting new ideas into practice.

Our strength lies in our formula: straight, to the point and still personal. Fast and effective. Combining craftsmanship with flair.”

-Suitsupply

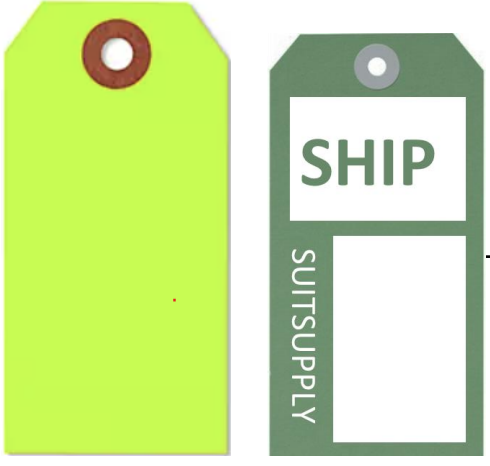
1.2 Shipping Station

Use only clear bins containing different use case supplies. Nearly labeled with the label maker.

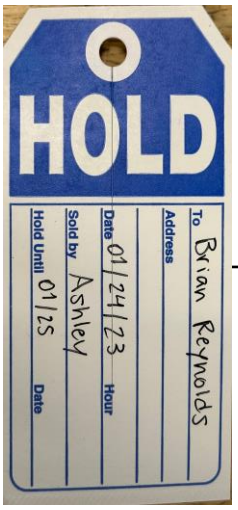
Maintain clean & organized table surfaces .

Maintain additional supplies organized for easy access.

Whether you choose to separate your supplies by a specific area or split them, the best practices are to maintain the area clean and organized in a way that makes sense: Fast, effective & direct.

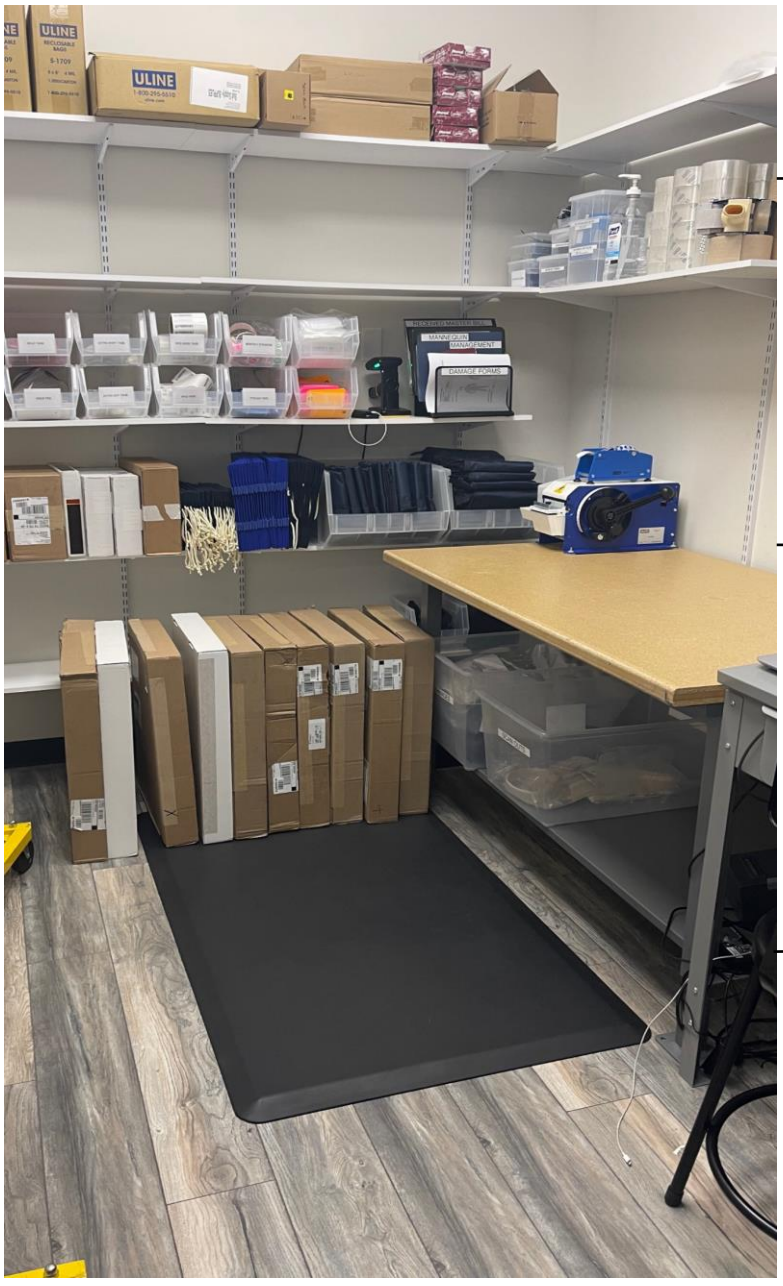


Shipping



Unpaid hold(s)

Shipping Station



Maintain supplies so they are easily visible. This helps to ensure you always have enough on-hand and a quick visual aid when needing to place a supply order.

Frequently used supplies are best to maintain at mid-range level for easy access.

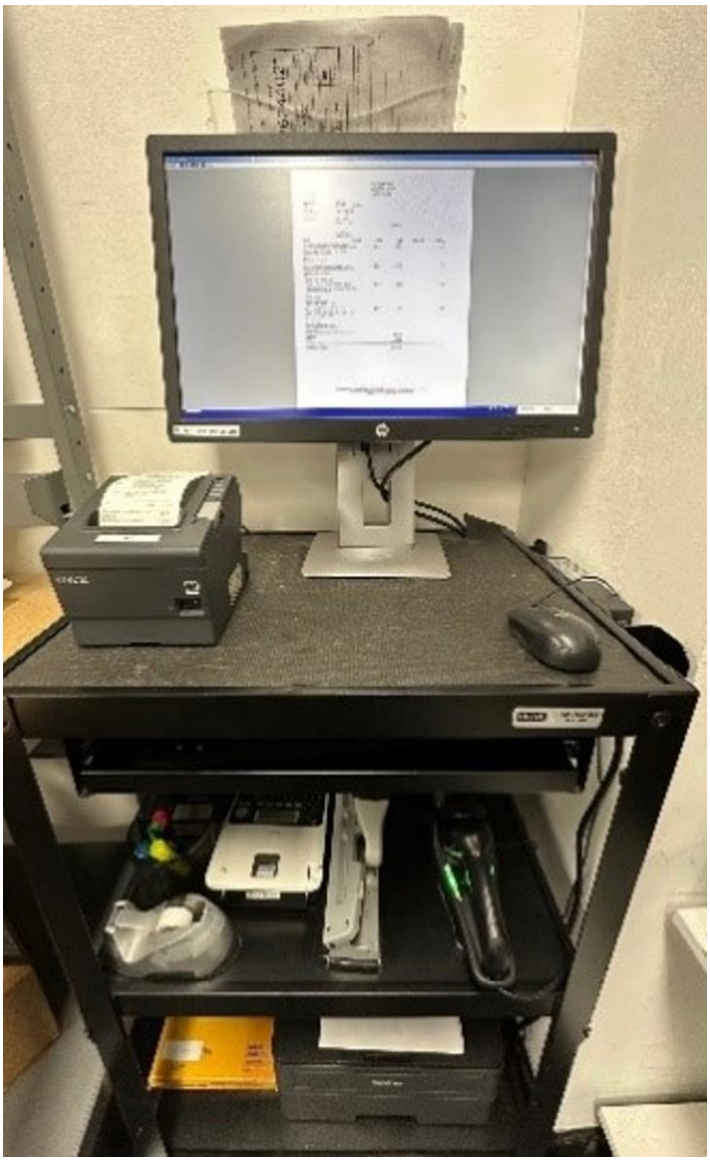
Maintain floor areas clean for an organized receiving and shipping process.

Shipping and receiving areas must be kept clean and organized. This is part of the daily open/close store checklist.

1.3 BOH Tech

Back of house computer must have the following essentials:

- BOH receipt printer
- UPS printer
- 2D scanner
- Pathfinder and docking station
- Brother printer
- Month stickers
- Label maker
- Tape, pens, paper supplies, hole puncher, box cutter and relevant supplies.



We also suggest “clearly [tagging] all office supplies that are used in the back room so that it is obvious that they are to be returned there if found elsewhere in the store.”

Designated charging area for all tech devices to be properly charging at the end of day. Cords should be neatly wrapped and secured.

1.4 Shipping Process

Create a clear designated place for your garments to be shipped and allow separation from any other product.

Always use a new box & garment bag when shipping customers garments. If shipping to another store or warehouse, you can reuse a box that is in good condition.

Cleanly apply the tape closing the edges.

Always include as much information as possible in the reference option when creating a ups label such as, order number, employee ID and product code(s) in the reference. This will allow for checking which products was sent to the customer when tracking orders.
