Stores Performance

Location is San Francisco Predefined Period is Week to Date Select Currency is USD Location Type is Store or Outlet

This dashboard is mobile optimized, read from left to right, top to bottom on laptop. Scroll down on mobile.
Filter on the desired period, the region, it's regional manager and a specific location to get Stores Performance at the store level. This dashboard only displays active locations.

This dashboard does not show data in real-time but refreshes once per day. For the most recent numbers, use the Insights App.

All comparison figures are Like for Like (LfL), comparing to the exact same period last year.
You can drill-down to the employee level by clicking on the measures themselves.
